Barracuda XDR Network Security

Comprehensive network protection

84% of organizations have been breached as a direct result of a network attack in the past 12 months according to recent research. Protect your environment with Barracuda XDR Network Security which is supported by a 24/7 Security Operations Center (SOC).

Simplify network security services

Monitor your firewalls and network devices for malicious activity and detect intrusions on your network. Suspected threats are correlated with telemetry from other data sources and analyzed by Barracuda XDR Network Security and our team of experts 24/7.

Gain security expertise

Instantly augment your internal security resources with a team of tenured security experts who work in the background to provide a 24/7, proactive detection and response service. All identified incidents are triaged, and you are alerted and guided toward a resolution.

Enhance your network security by adding Barracuda Intrusion Detection Systems (IDS):

Barracuda IDS - Delivers best-in-class intrusion detection with hundreds of detection rules. It analyzes network traffic to detect Indicators of Compromises (IoCs). The Barracuda SOC manages the IDS to maximize your network security for your customers.

Part of the Barracuda XDR suite:

XDR - Proactive cybersecurity-as-a-service platform backed by teams of tenured security experts in a 24/7 Security Operations Center (SOC).

XDR Endpoint Security - Efficiently and effectively detect and respond to advanced threats such as zero-day attacks, ransomware, and more.

XDR Email Security - Proactively monitors your existing email security solution to enhance protection against spear phishing, business email compromise (BEC), and more.

XDR Cloud Security - Secures your cloud environments from unauthorized access to cloud mailboxes, admin changes, impossible logins, and brute force attacks.

XDR Network Security - Detects potential threat activity on your networks, such as command-and-control connections, denial-of-service attacks, data exfiltration, and reconnaissance.

XDR Server Security - Protects your systems from sophisticated attacks such as password sprays, brute force attacks, and privilege escalation.

Key features:

- **Threat intelligence** includes billions of IoCs

- Understands attack tactics and predicts their next steps via detection rule mapping with **MITRE ATT&CK® framework**

- **Correlates telemetry** from multiple sources with your existing security tools to provide greater visibility.

- Provides visibility of threat activity in **XDR Dashboard**

- Leverages **SIEM** and **SOAR** technologies

- Supports **Custom alerting** and **self-service report**s

- Includes **24/7/365 SOC** support and remediation guidance

- Backs critical security controls within industry standards and compliance frameworks such as **continuous monitoring** and **log retention**

Key integrations:

- Barracuda CloudGen Firewall
- Barracuda SecureEdge
- Check Point FireWall-1
- Cisco Adaptive Security Appliance (ASA)
- Cisco Meraki
- Cisco Umbrella
- Citrix Netscaler
- Juniper XDR Series
- Juniper Secure Services Gateway
- Fortinet FortiGate Firewall
- Palo Alto Firewall
- SonicWALL Firewall
- Sophos UG
- Sophos XG
- WatchGuard Firebox Firewall
- And many more
